

§219.9 Public participation, collaboration, and notification.

The Responsible Official must use a collaborative and participatory approach to land management planning, in accordance with this subpart and consistent with applicable laws, regulations, and policies, by engaging the skills and interests of appropriate combinations of Forest Service staff, consultants, contractors, other Federal agencies, federally recognized Indian Tribes, State or local governments, or other interested or affected communities, groups, or persons.

(a) *Providing opportunities for participation.* The Responsible Official must provide opportunities for the public to collaborate and participate openly and meaningfully in the planning process, taking into account the discrete and diverse roles, jurisdictions, and responsibilities of interested and affected parties. Specifically, as part of plan development, plan amendment, and plan revision, the Responsible Official shall involve the public in developing and updating the comprehensive evaluation report, establishing the components of the plan, and designing the monitoring program. The Responsible Official has the discretion to determine the methods and timing of public involvement opportunities.

(1) *Engaging interested individuals and organizations.* The Responsible Official must provide for and encourage collaboration and participation by interested individuals and organizations, including private landowners whose lands are within, adjacent to, or otherwise affected by future management actions within the plan area.

(2) *Engaging State and local governments and Federal agencies.* The Responsible Official must provide opportunities for the coordination of Forest Service planning efforts undertaken in accordance with this subpart with those of other resource management agencies. The Responsible Official also must meet with and provide early opportunities for other government agencies to be involved, collaborate, and participate in planning for National Forest System lands. The Responsible Official should seek assistance, where appropriate, from other State and local governments, Federal agencies, and

scientific and academic institutions to help address management issues or opportunities.

(3) *Engaging Tribal governments.* The Forest Service recognizes the Federal Government's trust responsibility for federally recognized Indian Tribes. The Responsible Official must consult with, invite, and provide opportunities for federally recognized Indian Tribes to collaborate and participate in planning. In working with federally recognized Indian Tribes, the Responsible Official must honor the government-to-government relationship between Tribes and the Federal Government.

(b) *Public notification.* The following public notification requirements apply to plan development, amendment, or revision, except when a plan amendment is approved contemporaneously with approval of a project or activity and the amendment applies only to the project or activity, in which case 36 CFR part 215 or part 218, subpart A, applies:

(1) *When formal public notification is provided.* Public notification must be provided at the following times:

(i) Initiation of development of a plan, plan amendment, or plan revision;

(ii) Commencement of the 90-day comment period on a proposed plan, plan amendment, or plan revision;

(iii) Commencement of the 30-day objection period prior to approval of a plan, plan amendment, or plan revision;

(iv) Approval of a plan, plan amendment, or plan revision; and

(v) Adjustment to conform to this subpart of a planning process for a plan, plan amendment, or plan revision initiated under the provisions of a previous planning regulation.

(2) *How public notice is provided.* Public notice must be provided in the following manner:

(i) All required public notices applicable to a new plan, plan revision, or adjustment of any ongoing plan revision as provided at §219.14(e) must be published in the FEDERAL REGISTER and newspaper(s) of record.

(ii) Required notifications that are associated with a plan amendment or adjustment of any ongoing plan amendment as provided at §219.14(e) and that

Forest Service, USDA

§219.10

apply to one plan must be published in the newspaper(s) of record. Required notifications that are associated with plan amendments and adjustment of any ongoing plan amendments (as provided at §219.14(e)) and that apply to more than one plan must be published in the FEDERAL REGISTER.

(iii) Public notification of evaluation reports and monitoring program changes may be made in a manner deemed appropriate by the Responsible Official.

(3) *Content of the public notice.* Public notices must contain the following information:

(i) *Content of the public notice for initiating a plan development, plan amendment, or plan revision.* The notice must inform the public of the documents available for review and how to obtain them; provide a summary of the need to develop a plan or change a plan; invite the public to comment on the need for change in a plan and to identify any other need for change in a plan that they feel should be addressed during the planning process; and provide an estimated schedule for the planning process, including the time available for comments, and inform the public how to submit comments.

(ii) *Content of the public notice for a proposed plan, plan amendment, or plan revision.* The notice must inform the public of the availability of the proposed plan, plan amendment, or plan revision, including any relevant evaluation report; the commencement of the 90-day comment period; and the process for submitting comments.

(iii) *Content of the public notice for a plan, plan amendment, or plan revision prior to approval.* The notice must inform the public of the availability of the plan, plan amendment, or plan revision; any relevant evaluation report; and the commencement of the 30-day objection period; and the process for objecting.

(iv) *Content of the public notice for approval of a plan, plan amendment, or plan revision.* The notice must inform the public of the availability of the approved plan, plan amendment, or plan revision, the approval document, and the effective date of the approval (§219.14(a)).

(v) *Content of the public notice for an adjustment to an ongoing planning process.* The notice must state how a planning process initiated before the transition period (§219.14(b) and (e)) will be adjusted to conform to this subpart.

§219.10 Sustainability.

Sustainability, for any unit of the National Forest System, has three interrelated and interdependent elements: social, economic, and ecological. A plan can contribute to sustainability by creating a framework to guide on-the-ground management of projects and activities; however, a plan by itself cannot ensure sustainability. Agency authorities, the nature of a plan, and the capabilities of the plan area are some of the factors that limit the extent to which a plan can contribute to achieving sustainability.

(a) *Sustaining social and economic systems.* The overall goal of the social and economic elements of sustainability is to contribute to sustaining social and economic systems within the plan area. To understand the social and economic contributions that National Forest System lands presently make, and may make in the future, the Responsible Official, in accordance with §219.6, must evaluate relevant economic and social conditions and trends as appropriate during plan development, plan amendment, or plan revision.

(b) *Sustaining ecological systems.* The overall goal of the ecological element of sustainability is to provide a framework to contribute to sustaining native ecological systems by providing ecological conditions to support diversity of native plant and animal species in the plan area. This will satisfy the statutory requirement to provide for diversity of plant and animal communities based on the suitability and capability of the specific land area in order to meet overall multiple-use objectives (16 U.S.C. 1604(g)(3)(B)). Procedures developed pursuant to §219.1(c) for sustaining ecological systems must be consistent with the following:

(1) *Ecosystem diversity.* Ecosystem diversity is the primary means by which a plan contributes to sustaining ecological systems. Plan components must establish a framework to provide the
